SEGGER: Full support for first flash-based RISC-V microcontroller

Monheim, Germany – August 28th, 2019

SEGGER announces full support for the first commercially available flash-based RISC-V microcontroller introduced by GigaDevice Semiconductor Inc.

This support includes SEGGER's Embedded Studio integrated development environment for RISC-V, its market-leading J-Link debug probe, Ozone debugger, SEGGER's emPack with the RTOS embOS and Software Libraries in the fields of communication, data storage, compression and IoT, as well as the portfolio of Flasher production programmers.

"It has been a great honor to participate in the unveiling of the first commercial, flash-based, RISC-V microcontroller, from GigaDevice in Beijing," said Rolf Segger. "Our tools help to make the most of this new generation of devices. This is an important milestone for GigaDevice, SEGGER, and RISC-V."

About SEGGER

SEGGER Microcontroller has over twenty-five years of experience in Embedded Computer Systems, producing state-of-the-art software libraries, and offering a full set of hardware tools (for development and production) and software tools.

SEGGER provides an RTOS plus a complete spectrum of software libraries including communication, security, data compression and storage, user interface software and more. Using SEGGER software libraries gives developers a head start, benefiting from decades of experience in the industry.

SEGGER's professional software libraries and tools for Embedded System development are designed for simple usage and are optimized for the requirements imposed by resource-constrained embedded systems. The company also supports the entire development process with affordable, high-quality, flexible, easy-to-use tools.

It simply works!

The company was founded by Rolf Segger in 1992, is privately held, and is growing steadily. SEGGER also has a U.S. office in the Boston area and branch operations in Silicon Valley and the UK, plus distributors on most continents, making SEGGER's full product range available worldwide.

Why SEGGER?

In short, SEGGER has a full set of tools for embedded systems, offers support through the entire development process, and has decades of experience as the Embedded Experts.

In addition, SEGGER software is not covered by an open-source or required-attribution license and can be integrated in any commercial or proprietary product, without the obligation to disclose the combined source.

Finally, SEGGER offers stability in an often volatile industry making SEGGER a very reliable partner for long-term relationships.
