

It simply works!

SEGGER SystemView for RISC-V now available

Monheim, Germany – October 16th, 2019

SEGGER announces the availability of real-time visualization with SystemView for RISC-V embedded systems.

SystemView reveals the true runtime behavior of an application by utilizing its real-time recording and visualization capabilities. It uses J-Link and SEGGER's Real-Time Transfer (RTT) technology for continuous real-time recording and live analysis.

SystemView can ensure a system performs as originally designed. Through this tool engineers can track down inefficiencies, show unintended interactions and identify resource conflicts. It can save acquired traces to a file that can be used for future retrieval, documentation and analysis.

The numerous benefits of SystemView can now be applied to any RISC-V embedded system via System Bus Access (SBA). Freely available from SEGGER, it runs on Windows, Linux, and macOS. There are no license fees or hidden costs to factor in.

###

About SEGGER

SEGGER Microcontroller has over twenty-five years of experience in Embedded Computer Systems, producing state-of-the-art software libraries, and offering a full set of hardware tools (for development and production) and software tools.

SEGGER provides an RTOS plus a complete spectrum of software libraries including communication, security, data compression and storage, user interface software and more. Using SEGGER software libraries gives developers a head start, benefiting from decades of experience in the industry.

SEGGER's professional software libraries and tools for Embedded System development are designed for simple usage and are optimized for the requirements imposed by resource-constrained embedded systems. The company also supports the entire development process with affordable, high-quality, flexible, easy-to-use tools.

It simply works!

The company was founded by Rolf Segger in 1992, is privately held, and is growing steadily. SEGGER also has a U.S. office in the Boston area and branch operations in Silicon Valley and the UK, plus distributors on most continents, making SEGGER's full product range available worldwide.

Why SEGGER?

In short, SEGGER has a full set of tools for embedded systems, offers support through the entire development process, and has decades of experience as the Embedded Experts.

In addition, SEGGER software is not covered by an open-source or required-attribution license and can be integrated in any commercial or proprietary product, without the obligation to disclose the combined source.

Finally, SEGGER offers stability in an often volatile industry making SEGGER a very reliable partner for long-term relationships.
